

Siva Chandrasekhar Javvadi

9603950818 | sivachandrasekharj.3@gmail.com

Professional Summary

- **AWS DevOps Engineer** with **3+** years of hands-on experience in **designing, implementing, and managing** scalable **cloud infrastructure** on **AWS**.
- Skilled in **deploying, automating, and optimizing CI/CD pipelines** to ensure **high availability, performance, and reliability** of applications.
- Proven ability to implement **cost-effective cloud solutions** through resource **optimization, monitoring, and best-practice architecture** while supporting **secure and resilient** production environments.

Skills

Cloud Technologies	: AWS (S3, Redis, EC2, ECS, EKS, Route53, Dynamo DB, RDS)
Operating Systems	: Linux, Windows
Source Code Management	: Git, Git Hub, GitLab
Build Tools	: Ant, Maven
Containerization/Orchestration	: Docker, Docker Swarn, Kubernetes
Configuration Management	: Ansible, Terraform, CloudFormation
Monitoring	: Prometheus, Grafana, CloudWatch
CI/CD	: Jenkins, GitHub Actions, AWS CI/CD
Compliance& Security	: AWS Config, Inspector, GuardDuty, SonarQube, WAF& Shield
Scripting Languages	: Bash, Python, Shell, Groovy, YAML
Programming Languages	: React JS

Experience

Aug 2025 – Present, Lead AWS DevOps Engineer, Quinzex Intelligence

Sep 2022 – Aug 2025, AWS DevOps Engineer, Rackera Inc – Hyderabad

Projects

Reigns Infotech, Bengaluru

Aug 2025 - Present

Project: HTP Pickles

Lead AWS DevOps Engineer

Responsibilities:

- Led the cloud DevOps team in building and operating scalable infrastructure on **AWS** using **EC2, ECS, EKS, S3, Route53, RDS, DynamoDB, and Redis** to support enterprise HRMS workloads.
- Architected highly available and fault-tolerant environments leveraging **Auto Scaling, Load Balancers, Kubernetes, and Docker Swarn** for consistent application performance.
- Optimized cloud spends through continuous analysis with **AWS Cost Explorer**, efficient storage tiering in **S3**, and compute right-sizing across **EC2** and container platforms.
- Maintained SLA commitments by implementing proactive monitoring and alerting using **CloudWatch, Prometheus, and Grafana** across Linux environments.
- Enforced security and compliance standards through **AWS Config, Inspector, GuardDuty, WAF, Shield**, and static code analysis with **SonarQube**.
- Automated infrastructure provisioning and configuration using **Terraform, CloudFormation, and Ansible**, ensuring repeatable and auditable deployments.
- Streamlined CI/CD workflows with **Jenkins, and AWS CI/CD**, integrating builds via **Maven** and **Ant**.

- Enabled containerized deployments through **Docker**, image management with **ECR**, and orchestration using **Kubernetes (EKS)**.
- Diagnosed and remediated production incidents using structured root-cause analysis, minimizing downtime across cloud and application layers.
- Collaborated with development teams using **GitHub**, supporting application components built with **React JS**.
- Authored automation and deployment scripts using **Bash, Python, Shell, Groovy, and YAML** to improve operational efficiency and deployment speed.

Rackera Inc, Hyderabad
AWS DevOps Engineer

Sep 2022 – Aug 2025

Responsibilities:

- Managed and supported infrastructure for **50+ applications** across multiple environments, ensuring stability, availability, and consistent performance.
- Handled application deployments and updates using **AWS services (EC2, ECS, S3, RDS, Route53)** to ensure proper maintenance of servers and efficient storage units across environments.
- Monitored application health and infrastructure metrics using **CloudWatch, Prometheus, and Grafana**, responding to alerts and performance anomalies.
- Performed day-to-day operational support on **Linux and Windows** systems, including service restarts, log analysis, and system checks.
- Assisted in containerized deployments using **Docker** and supported orchestration tasks on **Kubernetes** and **ECS**.
- Implemented and maintained CI/CD pipelines with **Jenkins, GitHub Actions**, enabling faster and more reliable releases.
- Supported configuration and environment consistency using **Ansible**, with exposure to **Terraform and CloudFormation** for infrastructure updates.
- Ensured baseline security and compliance by following **IAM policies**, network controls, and vulnerability findings from **AWS Inspector** and **GuardDuty**.
- Coordinated with multiple development teams through **Git, GitHub, and GitLab**, supporting diverse application codebases.
- Conducted troubleshooting and incident resolution across applications, reducing downtime through structured analysis and timely fixes.
- Documented operational procedures, deployment steps, and common issues to improve team knowledge and onboarding efficiency.

Education

Bachelors in Technology in **Civil** from **MVR College of Engineering and Technology – 2021 | JNTUK | CGPA: 8.03**
